

See the Light

Menlo Systems, a leading developer and global supplier of instrumentation for high-precision metrology, was founded in 2001 as spin-off of the Max Planck Institute of Quantum Optics.

Known for the Nobel-Prize-winning Optical Frequency Comb technology, the Munich based company offers complete solutions based on ultrafast lasers, synchronization electronics and THz systems for applications in industry and research.

Over the years, with more than 80 employees across offices in Germany and the US, Menlo Systems became the market leader in laser-based precision measurements, including the Optical Frequency Comb technology.
